Subject: RE: IPL

Hi Arjun,

I think we need following JSON/REST APIs:

- For each request and response lets add reqID
- For each request other than login, usrSessionHdl is required to be provided
- Login:
 - o Request to contain the following
 - User authenticationType: email/linkedin/facebook/google
 - userName:
 - password or snsHandle
 - couponCode: optional
 - clientPlf: android/ios/..
 - deviceType: Smartphone/Tablet/Phablet...
 - appVersion:
 - uniqueDeviceID;
 - pushNotificationID:
 - o Response to have
 - Success/failure
 - Error code: For e.g. if new user then indicate to tell user is new so registered to the system
 - useSessionHdl shared by backend to use used in each subsequent API call
- getMyTests: This will have,
 - o list of tests (array)
 - testID: Unique for each test
 - o Overall user count for top right
- getTestContents:
 - o Request to have array of testID for which content is requested
 - o Response will have,
 - list of tests (array): in each test
 - its meta info
 - o testID: Unique for each test
 - o testDescription: Brief description of the test
 - o Count for your group
 - o Overall count of people who have taken this test
 - o Expiry time for it if/any
 - o Test category/type: Linear/Other/More?
 - o Skipping allowed flag?
 - o 1 or 2 more flags may come in
 - Detailed test description
 - list of questions for each question
 - o Question Text
 - o Array of options: in each option
 - optionID

- Option Text
 - Correct answer/option for it
 - weight for each answer
- submitUserResponses
 - testID
 - Array of responses, each response to consist of
 - optionID selected by user (how to indicate skipped?)
- getUserTestReport
 - testID
 - Response to consist of download link of report?
- requestCoachAppointment
 - testID
- inviteFriends
 - testID
 - Array of friends invited
 - Friend email ID
 - Friend name
- Logout
 - usrSessionHdl

Can you please think it over and let me know in case of clarifications? If OK do update the API doc.

Sachin any API missing? Or other feedback above?

Cheers,
Rahul.
